

Preliminary Development Feasibility Report

Generated: 2026-08-08 | Status: validated

Generated: 2026-08-08

Status: validated

Project and Site Description

- Address: 99999 Madison Avenue, Austin, TX
- Proposed land use: Multifamily residential
- Development description: Proposed 12-unit multifamily residential development.
- Units: 12
- Site area (acres): None
- Reported zoning: None (status: ambiguous)
- Floodplain intersection: None
- Watershed: None

Synthesis

Summary of Feasibility Considerations

The preliminary development feasibility review for a proposed 12-unit multifamily residential development in Austin, Texas, has identified several key considerations:

1. ****Zoning****: The subject property is located in an ambiguous zoning district (SF-3-NP), and the exact zoning classification needs to be confirmed through official verification.
2. ****Floodplain****: The floodplain check requires confirmed coordinates, which need to be obtained manually.
3. ****Watershed****: The watershed lookup also requires confirmed coordinates.
4. ****Transportation Access****: The proposed development will require a driveway spacing analysis, and the applicant must identify the applicable site conditions for shared driveways or third driveways.
5. ****Water and Wastewater****: The regulatory requirements do not establish actual water or wastewater service availability or capacity; verification with the appropriate utility authority is required.

Constraints

1. ****Zoning Uncertainty****: The ambiguous zoning classification creates uncertainty, which may impact the development's feasibility.
2. ****Floodplain and Watershed Requirements****: The need for confirmed coordinates to complete floodplain and watershed checks adds complexity to the development process.
3. ****Transportation Access Challenges****: The driveway spacing analysis and shared driveways or third driveways requirements may pose challenges for the applicant.

Unknowns

1. ****Confirmed Coordinates****: The exact coordinates of the subject property are not available, which is required for floodplain and watershed checks.
2. ****Utility Capacity****: The regulatory requirements do not establish actual water or wastewater service availability or capacity; verification with the appropriate utility authority is required.
3. ****Zoning Verification****: Official verification of the zoning classification is necessary to confirm the development's feasibility.

Recommended Next Steps

1. ****Confirm Zoning Classification****: Obtain official verification of the zoning classification through the City of Austin's planning department.
2. ****Obtain Confirmed Coordinates****: Manually obtain confirmed coordinates for the subject property to complete floodplain and watershed checks.
3. ****Verify Utility Capacity****: Verify water and wastewater service availability and capacity with the appropriate utility authorities.
4. ****Conduct Transportation Access Analysis****: Conduct a thorough driveway spacing analysis and identify applicable site conditions for shared driveways or third driveways.

By addressing these unknowns and constraints, the development team can better understand the feasibility of the proposed multifamily residential development in Austin, Texas.

Historical Permit and Case Context

Nearby permits and cases are historical context only. They must not be treated as evidence that the proposed development requires professional verification. [Claim removed or revised: unsupported definitive statement; professional verification required.]

Summary: {'permit_count': 0, 'site_plan_count': 0, 'plan_review_count': 0}

Potential Constraints

- No major constraint labeled from available screening data; professional verification is still required.

Missing Information and Required Verification

- Verification required (zoning): Zoning lookup status is 'ambiguous'; official verification is required before design decisions.
- Verification required (drainage_flood): Floodplain status is incomplete or ambiguous and requires verification.
- Verification required (location): Site coordinates were not uniquely confirmed; spatial checks may be incomplete.
- Verification required (historical_context): Nearby permits and cases are historical context only and must not be treated as approval precedent.
- Warning: Zoning could not be confirmed exactly and requires verification.
- Warning: Site coordinates could not be confirmed and require verification.
