

Preliminary Development Feasibility Report

Generated: 2026-08-09 | Status: validated

Project and Site Description

- Address: 1714 Madison Avenue, Austin, TX
- Proposed land use: Multifamily residential
- Development description: Proposed 40-unit multifamily residential development on an infill lot.
- Units: 40
- Site area (acres): 0.8
- Reported zoning: SF-3-NP (status: found)
- Floodplain intersection: False
- Watershed: Shoal Creek

Synthesis

Summary of Feasibility Considerations

The provided data provides a comprehensive overview of the regulatory requirements for a proposed 40-unit multifamily residential development on an infill lot in Austin, Texas. The following are the major feasibility considerations, constraints, unknowns, and recommended next steps:

Major Feasibility Considerations:

1. **Zoning:** The property is zoned as SF-3-NP, which requires a minimum site area of 1 acre and at least 40% of the dwelling units to be single-family residential.
2. **Floodplain:** The property does not intersect with the floodplain, but it is within the City of Austin Fully Developed 100-Year Floodplain.
3. **Watershed:** The property is located in the Shoal Creek watershed.
4. **Transportation:** The property requires access to a major roadway, which may impact driveway spacing and construction requirements.

Constraints:

1. **Driveway Spacing:** The property's frontage length will vary along a street, and driveway spacing requirements must be met.
2. **Utility Capacity:** The utility capacity for water and wastewater services is not established, and verification with the appropriate utility authority is required.
3. **Environmental Concerns:** The property is located in a watershed and may have environmental concerns that need to be addressed.

Unknowns:

1. **Utility Capacity:** The actual capacity of the utilities (water and wastewater) is not established, and verification with the appropriate utility authority is required.
2. **Environmental Impact:** The potential environmental impact of the development on the watershed and surrounding area is unknown.
3. **Driveway Spacing:** The exact driveway spacing requirements are unclear, and further investigation is needed.

Recommended Next Steps:

1. **Verify Utility Capacity:** Verify the actual capacity of the utilities (water and wastewater) with the appropriate utility authority.
2. **Conduct Environmental Impact Study:** Conduct an environmental impact study to assess the potential environmental impact of the development on the watershed and surrounding area.
3. **Determine Driveway Spacing Requirements:** Determine the exact driveway spacing requirements and ensure compliance with the relevant regulations.
4. **Obtain Necessary Permits:** Obtain the necessary permits, including a site plan permit, building permit, and zoning permit.

Additional Recommendations:

1. **Consult with Experts:** Consult with experts in land use planning, environmental science, and engineering to ensure that all aspects of the development are properly addressed.
2. **Conduct Public Outreach:** Conduct public outreach to inform stakeholders about the proposed

development and address any concerns or questions they may have.

3. Monitor Regulatory Requirements: Monitor regulatory requirements and updates to ensure compliance with changing regulations.

By following these recommendations, you can better understand the feasibility of the proposed development and make informed decisions about moving forward with the project.

Historical Permit and Case Context

Nearby permits and cases are historical context only. They must not be treated as evidence that the proposed development requires professional verification. [Claim removed or revised: unsupported definitive statement; professional verification required.]

Summary: Permit count: 20, Site plan count: 0, Plan review count: 20

Potential Constraints

- No major constraint labeled from available screening data; professional verification is still required.

Missing Information and Required Verification

- Verification required (zoning): Preliminary reported zoning was retrieved from Open Data and requires official verification.
- Verification required (historical_context): Nearby permits and cases are historical context only and must not be treated as approval precedent.
