

Preliminary Development Feasibility Report

Generated: 2026-08-09 | Status: validated

Project and Site Description

- Address: 306 W 55th Street, Austin, TX
- Proposed land use: Multifamily residential
- Development description: Proposed 24-unit multifamily residential development with surface parking.
- Units: 24
- Site area (acres): 0.5
- Reported zoning: SF-3-NP (status: found)
- Floodplain intersection: True
- Watershed: Waller Creek

Synthesis

Based on the provided data, here is a summary of major feasibility considerations, constraints, unknowns, and recommended next steps for the proposed 24-unit multifamily residential development:

Major Feasibility Considerations:

1. Zoning: The proposed development is zoned as SF-3-NP, which requires compliance with site development regulations for a family residence (SF-3) district.
2. Floodplain: The property intersects the City of Austin Fully Developed 25-Year Floodplain, requiring an engineering flood study to govern.
3. Watershed: The property is located in the Waller Creek watershed, which may impact water quality and stormwater management requirements.

Constraints:

1. Site area: The proposed development requires a minimum site area of 800 square feet per dwelling unit, which may be challenging given the small site area of 0.5 acres.
2. Parking: The proposal includes surface parking, which may not meet current parking standards and regulations.
3. Utility capacity: The proposal does not specify whether the developer will provide their own utility connections or rely on existing infrastructure.

Unknowns:

1. Water quality requirements: The proposal does not address water quality concerns, such as stormwater management and wastewater treatment.
2. Transportation access: The proposal does not specify how residents will access the development, which may impact traffic flow and safety.
3. Environmental impacts: The proposal does not provide information on potential environmental impacts, such as habitat disruption or noise pollution.

Recommended Next Steps:

1. Conduct a site analysis to determine the feasibility of the proposed development, including assessing the site's topography, soil conditions, and environmental factors.
2. Review and comply with relevant zoning regulations, including site development requirements for SF-3-NP districts.
3. Engage with the City's Floodplain Management Office to determine the necessary steps to mitigate flood risks and ensure compliance with engineering flood study requirements.
4. Consult with the City's Watershed Protection Department to understand water quality concerns and develop strategies for managing stormwater runoff and wastewater treatment.
5. Conduct a transportation access analysis to determine how residents will access the development, including assessing traffic flow and safety implications.
6. Develop a comprehensive environmental impact assessment to identify potential environmental impacts and mitigate them through design and mitigation measures.

By addressing these feasibility considerations, constraints, unknowns, and recommended next steps, the developer can better understand the challenges and opportunities associated with the proposed development and make informed decisions about moving forward with the project.

Historical Permit and Case Context

Nearby permits and cases are historical context only. They must not be treated as evidence that the proposed development requires professional verification. [Claim removed or revised: unsupported definitive statement; professional verification required.]

Summary: Permit count: 20, Site plan count: 4, Plan review count: 20

Potential Constraints

- [potential constraint] drainage_flood: Site intersects the fully developed floodplain model used for preliminary screening.

Missing Information and Required Verification

- Verification required (zoning): Preliminary reported zoning was retrieved from Open Data and requires official verification.
- Verification required (historical_context): Nearby permits and cases are historical context only and must not be treated as approval precedent.
