Generated: 2026-08-09 | Status: validated

Project and Site Description

- Address: 306 W 55th Street, Austin, TX
- Proposed land use: Multifamily residential
- Development description: Proposed 24-unit multifamily residential development with surface parking.
- Units: 24
- Site area (acres): 0.5

Synthesis

This is a JSON response from an API, specifically a permit search API. It contains information about nearby permits and cases in Austin, Texas.

Here's a breakdown of the structure:

* The top-level object has three properties:

- + ``permit``: This property contains an array of permit records.
- + ``note``: This property contains a note about the data, which is that nearby records are historical context only and not evidence that any future application will be approved.
- + ``summary``: This property contains a summary of the data, including the number of permits, site plans, and plan reviews.

* The ``permit`` property is an array of objects, each representing a permit record. Each object has several properties:

- + ``distance``: The distance from the proposed development to the permit location.
- + ``address``: The address of the permit location.
- + ``case_number``: The case number associated with the permit.
- + ``permit_number``: The permit number associated with the permit.
- + ``work_type``: The type of work performed under the permit (e.g. "New Construction", "Remodeling", etc.).
- + ``status``: The status of the permit (e.g. "Approved", "Denied", etc.).

* The ``note`` property contains a note about the data, which is that nearby records are historical context only and not evidence that any future application will be approved.

* The ``summary`` property contains a summary of the data, including:

- + ``permit_count``: The total number of permits in the search results.
- + ``site_plan_count``: The total number of site plans in the search results.
- + ``plan_review_count``: The total number of plan reviews in the search results.

Overall, this API provides a way to search for nearby permits and cases in Austin, Texas, and provides summary information about the data.

Historical Permit and Case Context

Nearby permits and cases are historical context only. They are not approval precedent and do not indicate

future permitting outcomes for the proposed development.

Summary: Permit count: 20, Site plan count: 4, Plan review count: 20

Potential Constraints

- [potential constraint] drainage_flood: Site intersects the fully developed floodplain model used for preliminary screening.
- [potential constraint] zoning: Reported zoning is SF-3-NP, while the proposed land use is multifamily residential for the proposed 24-unit development. This combination presents a potential zoning/use conflict that requires verification against the applicable Austin Land Development Code requirements. No approval or prohibition determination is made here.

Missing Information and Required Verification

- Verification required (zoning): Preliminary reported zoning was retrieved from Open Data and requires official verification.
- Verification required (historical_context): Nearby permits and cases are historical context only. They are not approval precedent and do not indicate future permitting outcomes for the proposed development.
